I'm a 17-year-old high school student, passionate about web development, with an interest in designing platforms focused on user experience and addressing real-world problems, particularly in healthcare, accessibility, and audience feedback systems. I have experience creating website concepts with structured user interfaces focused on effective impact. I'm passionate about exploring different areas of technology, particularly programming, and I actively participate in international competitions and social impact initiatives to build practical and scalable digital solutions.

Education

Technical Diploma in Software and Web Development

We Applied Technology School

Expected Graduation: **2026**

Experience & Achievements

May-2024

ECPC – Ranked 53rd

Participated in one of Egypt's top competitive programming contests.

November -2024
